# POWDER COATING PROCESS

## Exclusive DSI Powder Coating Process

DSI's proprietary 10 step powder coating process provides an uncompromising quality created by state-of-the-art technology. Our system is certified by the Powder Coating Institute providing peace of mind in your investment. Our powder coating is verified by the American Architectural Manufacturers Association (AAMA) / Fenestration and Glazing Industry Alliance (FGIA) and is covered by a Lifetime Limited Warranty.

**1** The raw premium-grade aluminum is inspected to be free of blemishes and is not exposed to the outdoor elements.

**2** The product enters a heated cleaning stage to remove extrusion debris and fabrication oils.

**3-6** **Clean:** City water rinse.  
**Cleaner:** Recycling reverse osmosis water rinse  
**Cleanest:** Pure reverse osmosis water rinse  
**Sealer:** Dried-in-place aluminum sealer

**7-8** A 200 MPH air blast removes water drops from the pre-treated aluminum. A convection oven completes the dry-off process.

**9** Powder is applied with 18 automated and 2 manual spray guns. Compressed process air is dried to -35°F Dew Point for superior adhesion.

**10** The powder coating is then bonded and adhered to the aluminum substrate in a 400 degree cure stage.
